

PAID INTERN WANTED!

Since 1968, the Scott family has succeeded in the construction equipment business by treating customers, employees, suppliers and partners with honesty, fairness, and respect. They adhere to the highest ethical standards; commit themselves to established, long-term relationships that benefit both parties; provide for employee growth and development; and actively participate in building a better community. As the company evolves and diversifies, their commitment to these principles remain solid and constant. Scott Intermountain serves the needs of contractors, property and facility managers, industrial, agricultural and residential customers throughout the Intermountain West with a full spectrum of quality construction equipment, accessories, parts and services for skid steer loaders, project support and financing. They offer a dedicated and experienced team of sales, service and project specialists to deliver customer value via three strategic business units: [Intermountain Bobcat](#), [Intermountain Compact Equipment Supply](#), and [Intermountain Sustainable Power Systems](#). At Scott Intermountain, they apply their products and services, resources and energy to help customers operate more efficiently, more effectively, and more profitably.

Scott Intermountain is seeking an intern for the summer 2017 semester. The Intern will be fully immersed in the varied aspects of Scott Intermountain and its business units. The Intern will work with Scott Intermountain leadership to identify appropriate research and data analysis projects that will best aide in the continued and growing services they offer. The Intern may be assigned to multiple projects in varying degrees of involvement. The Intern will collect, analyze, and synthesize research and information into deliverable reports. Specifically, projects may include the following:

- Market research
- Research into customer perceptions: quality, customer service, value proposition, image
- The role of Millennials role in business: employees, customers, suppliers
- Solar/Wind as a value ad and component of culture: how to publicize
- The role of technology in business

The Intern will be expected to professionally engage with sensitive data to best represent factual evidence gathered during the internship experience. Hours, begin and end date, and holiday schedule will be agreed upon with direct supervisor.
