FCS Policy Platter: Family History, Neighborhoods and Diabetes Risk

Kristen Hawkes, an anthropology professor at the University of Utah, wrote that menopause is not new and it is not due to support for the consumer. Her research shows that menopause can be caused by a variety of factors, including genetics, environment, and lifestyle. Hawkes suggests that understanding the factors that contribute to menopause can help individuals take steps to reduce their risk.

An ode to grandmothers and their grandchildren.

Many of our November & December events are happening remotely. Please check our website for more information.

WEDNESDAY, DECEMBER 2, 2020, 1 – 2PM | Virtual Meeting

Learn more about the Beacons of Excellence Award Educational experience.” Congrats! Congratulations to the CSBS Student Success Center! It has been recognized as a 2020 recipient for the University of Utah Beacons of Excellence Award. This well-deserved recognition is bestowed due to the CSBS Student Success Center as providing “an absolutely transformative educational experience.” Congrats!

AIR POLLUTION'S EFFECTS ON HOMELESS

Researchers from the University of Utah have found evidence that air pollution is having a significant impact on homeless populations. Their study shows that exposure to air pollution is linked to an increased risk of respiratory and cardiovascular problems, as well as an increased risk of developing mental health issues such as depression.
