The U of U Department of Geography presents:

MAPPING MOUNTAINS AT NATIONAL GEOGRAPHIC: METHODS FOR SHADED RELIEF DEPICTION

with Martin Gamache, Senior Graphics Editor of Maps National Geographic Magazine

Friday, February 22, 2013 at 11:45 in OSH 175

Martin Gamache will lecture on styles and techniques of cartographic shaded relief depiction used in map production by National Geographic Magazine. He will discuss the specific design considerations of producing a map for the magazine, and will demonstrate the tools and methods he uses to create detailed shaded relief of topography for publication.

Mr. Gamache has been a cartographer at National Geographic Magazine since 2007, and has won several awards for his maps. He specializes in production cartography, data modeling, and map design with a focus on mapping of the cryosphere, land-use/land-cover, and urban phenomena.
